

ExamStudio is a powerful, customizable, easy-to-use and secure online system for developing and delivering tomorrow's tests today. It is the only system on the market that can support advanced interactive 3D and media rich 2D items in addition to performing traditional item-banking functions.

ExamStudio gives you the control and flexibility you want and the cost-effectiveness and performance edge you need to stay ahead of your competition. The online system facilitates streamlined test-development processes and provides test developers with the freedom to choose and change test format and method of delivery. ExamStudio is being used by several of the most prominent test sponsors in the United States and is supporting tests of all types and formats, in 17 languages around the world.

Software Features

ITEM AUTHORIZING	RESOURCE & CASE MANAGEMENT	TEST DEVELOPMENT	TEST PRODUCTION AND DELIVERY
<ul style="list-style-type: none"> • Easy-to-navigate dashboard enables fast access to data. • Simple tools enable the creation of both traditional and performance-based items. • Customizable fields facilitate complex data organizing, searching and reporting. • History of item changes ensures editorial integrity. 	<ul style="list-style-type: none"> • A robust, searchable banking system for managing images, charts, graphs and audio and video files. • Advanced item management features for cases using 2D rich media and 3D simulations. • Analysis functions that include full playback of candidate's interactions with advanced items. 	<ul style="list-style-type: none"> • Online item authoring and test development tools that allow subject matter experts to collaborate from anywhere at anytime. • The highest security standards, including redundant secure servers, strict access codes and encrypted communications, protect sponsor products. 	<ul style="list-style-type: none"> • Integrated tools enable the creation of multiple versions of tests in multiple languages (including double-byte languages). • Integrated QTI conversion program allows for exporting tests in different formats, without expensive and time-consuming reformatting and republishing.

Atvantus is the only single source company that develops cutting-edge, performance-based examinations and provides integrated state-of-the-art, end-to-end testing and software solutions that support both traditional and advanced item types. Our company is a joint venture that optimizes the vision, expertise and experience of three leading certification, testing and software organizations — The Caviart Group, Professional Testing and Zoomorphix Systems.
