

FOUNDING PARTNERS

Caviart

Located in Virginia, The Caviart Group, LLC is a certification and assessment company specializing in international testing, simulations and advanced item types, and systems design for cutting-edge technology for certification programs.

Current projects include:

- Development of a 3D computer simulation exam for sonographers
- Creation of advanced, performance-based items for nurses and engineering technologists
- Management of the computer-based testing conversion, design of the candidate management system, and quality control for the Institute of Internal Auditors' global certification program.
- Design of the Candidate Management System for the National Institute for Automotive Service Excellence.

Clarence L. "Buck" Chaffee, President

Mr. Chaffee has more than 25 years of senior-level experience in the field of certification and testing. He directed the research and development of the Computer Simulation Examination for architectural licensing and conducted a joint research project on simulations examinations involving NCARB and NBME. He has more than 15 years of experience as CEO of an international testing and certifying body.

Professional Testing, Inc. is a full-service provider of assessment and evaluation consulting services. Its experienced staff of test developers and psychometricians provide clients with the full range of assistance from certification program development, through examination development and administration to accreditation. Offices are located in Florida and the District of Columbia.

Current projects include:

- Cardiovascular Credentialing International
- Florida Department of Environmental Protection
- The American Psychiatric Association
- American Board of General Dentistry

David Cox, CEO

Mr. Cox has more than 25 years experience in assessment practice issues related to licensure, occupational regulation and certification. He is responsible for the development of high stakes licensure and certification examinations at the state, national and international levels. Mr. Cox is Vice-Chairman of Environmental Health Testing and is a frequent speaker at national and international conferences on testing processes and standards.

Located in Australia, Zoomorphix Systems is a software development company that specializes in cutting-edge technological solutions for certification and testing organizations. Its products — ExamStudio and

Glass3D — provide state-of-the-art item development, banking and test delivery systems and media rich 2D and 3D interactive simulations for licensure and certification examinations.

Current projects include:

- Creation of interactive, 3D simulations for dentists, sonographers and engineering technologists
- Creation of QTI converter for the Institute for International Auditors' international examination that supports RTF file import and multiple languages

John Baker, CEO

John Baker has 17 years of experience designing complex enterprise and testing software. His cutting-edge performance-based testing software Glass3D has been used by leading companies, including Pearson Vue, to deliver the most technologically advanced examinations available today.
